

Editorial Board:

Zygmunt Bodnar — Chairman, Miron Gaj, Bedrich Havelka, Roman Ingarden, Bohdan Karczewski, Joachim Klebe, Jan Matysiak, Maksymilian Pluta, Zbigniew Puzewicz, Antoni Sojecki, Szczepan Szczeniowski, Bogusława Trzebiatowska

Editor in Chief — Miron Gaj

Secretary

Grażyna Mulak

Associate Editor — Ireneusz Wilk

Editorial Office

Instytut Fizyki Politechniki Wrocławskiej
Wybrzeże Wyspiańskiego 27,
50-370 Wrocław, Poland

Publisher

Politechnika Wroclawska (Technical University), Wybrzeże Wyspiańskiego 27,
50-370 Wrocław, Poland

In addition to larger original papers brief reports will be published of the authors' own research work. The reports should be set out according to the above guide lines.

The Editorial Board invites the readers to send over any remarks or observations referring to the publications which will appear in the *Optica Applicata*. The correspondence of essential importance will be published in a separate column dealing with letters to the Editor.

Review of Matter

Application of the diffraction theory, quantum optics, problems in radiation coherence, light sources, holography and its application, scientific photography, methods of image reconstruction, optical application of Fourier transforms, theory of optical systems, criteria of optical image evaluation, optical materials, technology of manufacturing optical elements, aspheric optics, optical properties of solids and thin films, lasers and their application, photo- and radiometry, problems in spectroscopy, non-linear optics, optical data processing, optical measurements, fibre optics, optical instrumentation, interferometry, microscopy, non-visible optics, automation of optical computing, optoelectronics, colorimetry, optical detectors, ellipsometry and photoelasticity.

OPTICA III APPLICATA 3

Contents

The First Czechoslovak-Polish Optical Conference — M. GAJ	3
A Multiple Coincidence Holographic Method of Obtaining a Number of Dynamic Process Records — T. LIPOWIECKI, Z. JANKIEWICZ	7
An Application of the Holographic Interferometry to Visualize Thermodynamical Processes — M. J. MATCZAK, Z. KRASKA	11
Use of Distributions in Some Transforms in Optics — B. STÁDNÍK, F. HOFF	17
An Approach to the Direct Recovery in Coherent Imaging — I. WILK	21
Report on Measurement of the Modulation Transfer Function of Photographic Materials — J. POSPÍŠIL, V. BUMBA	25
Modified Smith's Method for an Automatic Correction of Optical Systems — M. GAJ, L. MAGIERA	29
An Analysis of the Possibility of Applying Classical Formulae to the Position of Astigmatic Foci to Decentred Systems Assuming a Small Error of Centricity — M. GAJ, J. OSIŃSKI	37
An Analysis of Designing a Superachromatic Objective with a Flat Field — J. NOWAK	41
Correction of the Spherical Aberration in Polychromatic Light — J. KEPRT	49
Tolerances for Spherical Surfaces of Optical Elements Satisfying the Minimum Manufacture Cost Requirement — M. LEŚNIEWSKI	53
Influence of the Mirror Movement on the Image Blurring in the Ultra-High-Speed Cinematography — E. WNUCZAK	57
Application of Spatial Frequency Filtering Methods to Measurements, Identification and Coding — L. BOROWICZ, A. DUBIK	61
Operation Characteristic of a Cryptocyaline Mode-Locked Ruby Laser — F. KACZMAREK	63
Chronicle	
The First Nation-Wide Conference on Luminescence — H. ŁOŻYKOWSKI	
Letters to the Editor	77
Когерентное оптическое устройство для распознавания образов по их ориентации в плоскости А. ДУБИК, Л. БОРОВИЧ
