

# OPTICA APPLICATA

Vol. XXXII (2002) No. 4

PL ISSN 0078-5466

Index 367729

A joint publication of the

INSTITUTE OF PHYSICS  
WROCLAW UNIVERSITY  
OF TECHNOLOGY  
POLAND

&

SPIE/POLAND CHAPTER  
in association with  
SPIE – THE INTERNATIONAL SOCIETY  
FOR OPTICAL ENGINEERING

## Contents

<i>In commemoration of Professor Maksymilian Pluta</i> . . . . .	539
<b>Editorial</b> . . . . .	543
BINDIG U., ROHDE E., MÜLLER G., Advances of optical sensors in biomedicine . . . . .	545
WOJTKOWSKI M., KOWALCZYK A., TARGOWSKI P., GORCZYŃSKA I., Fourier-domain optical coherence tomography: next step in optical imaging . . . . .	569
KALUŻNY J.J., WOJTKOWSKI M., KOWALCZYK A., Imaging of the anterior segment of the eye by spectral optical coherence tomography . . . . .	581
ANGELSKY O.V., USHENKO A.G., BURKOVETS D.N., USHENKO YU.A., Laser polarization visualization and selection of biotissue images . . . . .	591
JÓZWICKI R., PATORSKI K., ANGELSKY O.V., USHENKO A.G., BURKOVETS D.N., USHENKO YU.A., Automatic polarimetric system for early medical diagnosis by biotissue testing . . . . .	603
CHWIROT B.W., SYPNIEWSKA N., BARCIKOWSKA E., Quantitative measurements of the fluorescence intensity – new method for a detection of melanoma cells in histopathological preparations . . . . .	613
CHWIROT B.W., CHWIROT S., Fluorescence detection of human tumours without photosensitisers . . . . .	625
KRUMEICH J.H., KNÜLLE-WENZEL A.F., Standing wave analysis for the vision of color . . . .	641
KOBEL J., SUCHWALKO A., PODBIELSKA H., Application of thermal imaging for human face recognition . . . . .	653
SIEDLECKI D., KASPRZAK H., New shape of videokeratometric illuminator . . . . .	665
KWAŚNY M., Light sources and diagnostic systems currently used in photodynamic therapy . . . . .	673
ULATOWSKA-JARZA A., PODBIELSKA H., Biosensor for urea detection based on sol-gel technology . . . . .	685
MROCZKA J., WYSOCHAŃSKI D., ONOFRI F., Optical parameters and scattering properties of red blood cells . . . . .	691
ŁOWALIŃSKA E., GÓRNICKI A., GRZEGORZEWSKI B., Optical measurement of blood sediment formation at high haematocrit . . . . .	701
LIEBERT A., TERAJEWICZ N., MANIEWSKI R., NILSSON G., DE MUL F.F.M., Estimation of scattering volume in short distance reflectance measurements by Monte Carlo modelling . . . . .	709
KRUSZEWSKI S., BURKE T.G., Camptothecins affinity to HSA and membranes determined by fluorescence anisotropy measurements . . . . .	721

WOŹNIAK B., DERA J., FICEK D., OSTROWSKA M., MAJCHROWSKI R., KACZMAREK S., KUZIO M., The current bio-optical study of marine phytoplankton .....	731
PAWLAK B., Changes of optical parameters in a suspension of <i>Scenedesmus obliquus</i> (chlorophyceae) .....	749
JELEŃ Ł., CEGIELSKI M., ULATOWSKA-JARŻA A., PODBIELSKA H., Influence of sample preparation methods on transmission electron micrographs of sol-gel materials .....	759
ADAMEK M., KAWCZYK-KRUPKA A., MOSTOWY A., CZUBA Z., KRÓL W., SIEROŃ A., Immunomodulatory effect of photodynamic therapy in patients with non-melanoma skin malignancies .....	767
KARASIŃSKI P., Influence of waveguide parameters on the difference interference in optical planar structure .....	775
KŁOSOWICZ S.J., PIECEK W., CZUPRYŃSKI K.L., Electro-optical properties of polymer -dispersed liquid crystals in antiferroelectric $\text{SmC}_A^*$ phase .....	797
PERZ P., STAŃKO J., Application of the quantitative analysis of interferograms in describing the acoustic features of the electro-acoustic transducer .....	807
BUKOWSKI R.J., KORTE D., Perturbation calculus for eikonal application to analysis of the deflectional signal in photothermal measurements .....	817
BŁACHOWICZ T., Inexpensive linear scanning of the Fabry–Perot interferometer .....	829
HAMED A.M., Diffraction using an amplitude grating object of truncated inverted parabolic shape .....	833
POLYANSKII V.K., ANGELSKY O.V., POLYANSKII P.V., Scattering-induced spectral changes as a singular optical effect .....	843
HLUBINA P., White-light spectral interferometry with the equalization wavelength determination used to measure distances and displacements .....	849
KACZMAREK D., DETKA A., Analysis of specimen composition with the complex method using the backscattered electrons .....	859
