Introduction

We present to the readers the next, fourth issue of “Business Informatics”. The articles contained in the journal describe the results of the scientific activities of Professors with significant academic achievements, as well as doctoral students from the Wrocław University of Economics, and many other science and research institutions. This testifies to the authors’ cooperation and constitutes an extension of scientific activity conducted outside the required classes.

The subject of the development and implementation of ICT is a source of many scientific considerations, and investing in modern ICT solutions is one of the main organizational improvement directions.

Therefore, the subject of management systems is always current and an important topic of this publication. The editors would like to thank the authors for their articles, thanks to which the magazine is alive and continuously developing.

An extremely valuable feature of the Business Informatics series is the fact that the studies contained in it are presentations of various opinions and points of view concerning the application of modern ICT solutions. The approaches and views presented by the Authors often allow the Readers to broaden their own reflections related to the created perception on the possibilities and directions of the application of information and communication technologies in economic practice.

It is also important to add that not all the papers sent for publication meet the formal and substantive requirements. This further increases the significance and value of those contributions which received double positive reviews and were selected for publication in this issue of Business Informatics. It is worth mentioning that the reviewers are scholars with significant scientific experience, both from Poland and many other countries around the world.

Currently, as a result of the multistage and strict formal and substantive verification of our journal, approximately 35% of the texts submitted are accepted for publication.

The editors of this issue would like to express their gratitude to all the authors who wanted to share their experiences and opinions. In addition, they would also like to thank the reviewers for their insightful and factual assessments of the submitted works.

Iwona Chomiak-Orsa, Zdzisław Półkowski
