<b>Katarzyna Rostek, Agata Zawistowska:</b> Marketing automation in the process of communication on the B2B market / Automatyzacja marketingu w procesie komunikacji na rynku B2B .....	72

## Preface

Hereby we present the next issue of the magazine Business Informatics. Thanks to the texts submitted by the authors, which are scientifically valuable, as well as the growing number of readers, our periodical not only continues, but also develops and is positively evaluated during accreditation and evaluation.

An extremely valuable feature of the Business Informatics series is the fact that the studies contained in it are the presentations of various points of view on the application of modern ICT solutions. Perspectives and views presented by the authors often allow readers to broaden their own reflections related to the created view on the possibilities and directions of application of information and communication technologies in economic practice.

It is also important that not all publications sent for publication meet the formal and substantive requirements. This further increases the significance and value of publications which have received double positive reviews and have been selected for publication in this issue of Business Informatics.

Currently, as a result of a multistage and strict formal and substantive verification of our journal, approximately 25% of the submitted texts are accepted for the publication.

The editor of this issue would like to express his gratitude to all the authors who wanted to share their experiences and opinions. In addition, he would like to thank the reviewers for their insight and factual assessments of the submitted works.

*Iwona Chomiak-Orsa*
